

ACMA Trading Limited has developed and implemented an Environmental Management System according to the International standard ISO 14001:2015. The following statement of principles and intentions comprise the Environmental Policy of the Company, applicable to all its activities. The Company's environmental objectives and targets are reviewed frequently and during the management review. The scope of registration covers the Purchase, Sales, Installations, Accounts and Administration, Support and Maintenance of products and services for the retail petroleum industry.

Principles

- We are committed to minimising the impact of our operations on the environment.
- We are committed to comply with all relevant environmental legislation and regulations and with other requirements to which the Company subscribes.
- We are committed to protect the environment through pollution prevention and continual improvement of our environmental performance. All our businesses take into account the effects that our activities have on the environment.
- We are committed to continually improve our environmental performance.
- We are committed to provide all necessary means for the implementation of the Environmental Management System.
- To incorporate in our strategies, policies and practices, measures aiming to the improvement of environmental performance

The principal objective of the above principles is:

- Minimization of the possibility of soil and underground water pollution.
- Minimization of waste
- Conservation of natural resources and energy.
- Correct management of chemicals.

Intentions

- To understand external and internal issues that may negatively or positively affect the environmental performance of the company
- To understand the needs and expectation of the stakeholders
- To understand, evaluate and address threats and exploit the opportunities that affect the environmental performance of the company
- To strengthen and commit leadership to environmental management
- To set environmental objectives and targets in order to manage the Company's important environmental impacts (considering the life cycle of our activities, product and services)
- To minimise the use of energy and natural resources through monitoring and increasing the efficiency of use and purchase environmental sound products wherever possible, while upholding the highest standards of quality and service.
- To minimise the possibility of environmental pollution through management of possible spillages according to environmental regulations.
- To minimise waste production and manage all streams produced according to the waste hierarchy and national and European legislation.
- To ensure that all our technical staff and employees in general, are aware of their individual responsibilities for acting in accordance with the policy.
- To educate staff so as to become more environmentally aware.
- To minimise the possibility of soil and underground water pollution resulting from our Company's activities.
- To communicate to our employees, customers and suppliers our policy and achievements in improving our environmental performance.
- To incorporate environmental management into everyday business practice.
- To encourage engagement of our business with local communities.
